

Stroke Connector May 2024 update

Welcome to the May 2024 update. We have new resources on Stroke Connector, blogs from our SSO network and opportunities for you to get involved.

New entries

- We have added all the case studies, tools and resource links from the SSO Toolkit in separate files for you to download [here](#). These cover topics including managing volunteers and finances, monitoring and evaluation, and media and promotion.

Get involved

- Don't forget that following the March of Dimes Canada and Stroke Association UK Collaborative Space in March, we set up a discussion on Stroke Connector. Please add your suggestions on topics that you would like to discuss in these sessions [here](#)
- We would still like to hear from survivors of stroke and families and carers about your knowledge of post-stroke spasticity and access to treatment. Please complete the survey [here](#)

Stroke support around the world

- We shared a number of blogs from SSOs around the world. You can read stories about:

[Building a stronger stroke support organization voice in Latin America](#)

[Stroke Action Rwanda promoting WSO's advocacy event](#)

[March of Dimes Canada's delivery of a mental health program](#)

The banner features a photograph of a healthcare professional in a white coat examining a patient's hand. The text is overlaid on a dark blue background. It includes the title "Post Stroke Spasticity", a survey question, a call to action, a URL, and a QR code.

Post Stroke Spasticity

Are you or is someone you know living with spasticity after a stroke?

The World Stroke Organization would like to hear from you!

Find out more and complete the short survey here
